

Etten-Leur, 3th July 2026

PPWR Readiness Statement

Dear Customer,

All PET products currently supplied by Pretium Etten-Leur comply with EU Regulations 1935/2004, 10/2011 and 2022/1616 for products containing RPET (supply in 30%, 50% or 100% RPET possible).

We are classified as a supplier under the EU PPWR 2025/40 and are responsible for providing downstream economic operators with the documentation required for conformity assessments.

We can confirm that we meet the requirements of art. 5 of EU 2025/40 as a supplier concerning Heavy Metals and PFAS which apply from the 12th of August 2026. This is based on:

1. The documents received from our raw material suppliers in which they have stated compliance with the PPWR Regulation for the raw materials they supply.
2. Based on the requirements of art. 8 of 10/2011 (high degree of purity), whereby the full composition must be known, PFAS is not mentioned as a (non) intentional added substance and also Heavy metals are below the limits mentioned in 10/2011 based on the documentation of our suppliers.
3. Scientific and industrial research confirms that PFAS are not intentional added to PET.

Regulation	Conforming
(EU) 2025/40 of 19 December 2024 on packaging and packaging waste (PPWR) - Article 5 describing restrictions regarding: PFAS substances: 1. Total Fluorine (TF) $\leq$ 50 ppm 2. Each individual PFAS $\leq$ 25 ppb 3. Sum of PFAS $\leq$ 250 ppb Heavy Metals (Pb, Cd, Hg, and Cr): 1. Sum of heavy metals $\leq$ 100 ppm	Any related substances are not intentionally added or used during our production processes.

Vossendaal 12, 4878AE Etten-Leur, The Netherlands

pretiumpkg.com

Based on the evidence currently available at the commission, when compliant with Total Fluorine screening, the packaging is safe and no further steps are needed.

Kind regards,

Quality Department Pretium
